

Alex Isaac Melendez

Software Engineer | Fintech Systems

PROFILE

Software Engineer with 10+ years of experience developing and maintaining banking and fintech applications in highly regulated environments. Strong background in C#, .NET, and system integrations, with experience contributing to modernization of legacy applications. Currently expanding skills in cloud technologies, including Microsoft Azure.

EXPERIENCE

Hyosung America — Software Engineer (2020 – Present)

- Contributed to development and enhancement of ATM and TCR software solutions used by major U.S. financial institutions
- Played a key role in modernizing applications by transitioning UI from XAML to HTML/JavaScript, reducing dependency on legacy technologies
- Collaborated with hardware, QA, and product teams to ensure reliable integration and compliance with banking standards
- Mentored junior engineers and supported team knowledge sharing

TEKSystems — Software Engineer (2019)

- Supported development of secure ATM applications in a regulated banking environment
- Assisted in hardware integration and implementation of customer-specific workflows

Banco Nacional de Costa Rica — Software Developer (2015 – 2019)

- Developed banking systems across web, intranet, and mobile platforms.
- Contributed to BN My Bank iOS application (Objective-C).

EDUCATION

Universidad Fidelitas, SJ, Costa Rica — Computer Systems Engineering, 2015

5079 Cross Creek Ln, Milford, OH 45150 513-814-7113
isaacmgpa@gmail.com

SKILLS

C#, .NET, JavaScript, TypeScript, HTML5, React (familiar), SQL Server, WCF, Agile

PROJECTS

Retail Application Modernization (Pivot)

- Contributed to migration of retail banking application UI from XAML to HTML/JavaScript while maintaining existing backend systems
- Assisted in ensuring feature parity between legacy and updated interfaces
- Collaborated with team members to support a smoother transition to modern web technologies

ATM Security Infrastructure

- Contributed to implementation of secure kiosk environments for ATM systems.
- Applied security measures including BitLocker encryption, application whitelisting, and system hardening techniques.
- Supported efforts to ensure compliance with banking security requirements for deployed systems .

Frontend Modernization Initiative

- Participated in transition of legacy JavaScript codebase to TypeScript and React
- Contributed to improving maintainability and structure of front-end components
- Supported development and testing of updated UI features

BN My Bank (iOS Application)

- Contributed to development of mobile banking features using Objective-C
- Assisted in delivering secure and user-facing functionality aligned with banking requirements

PROFESSIONAL DEVELOPMENT

Currently studying Microsoft Azure fundamentals and preparing for Azure Developer Associate (AZ-204)
